Subject Index to Volume 4—1982

Ataxia-telangiectasia, oral carcinoma after x-ray in patient with, 6:3

Behavioral strategies in oral hygiene instruction, 3:15
Book reviews, 2:23,29; 3:14,24; 4:12,29; 5:16
Britain, state dental service, 1:13

Calcifying fluids, effect on remineralization, 4:13
Carcinoma
  epidermoid, of the oral cavity, 6:3
  vs. pseudoepithelial hyperplasia, differential diagnosis, 6:9
Career orientations of dental wives, 4:23
Caries, prevention
  see also Fluorides
  high-risk patients and fluoride treatment programs, 2:11
  occlusal sealants, 5:3,11
  remineralization of enamel lesions, 4:13
  sugar and, 3:11
Case in Point
  enamel-bonded prosthesis, 5:30
  personalized laminate veneers, 3:20
  post, core, and inlay restoration, 6:20
Chest tray, patient, fabrication and use, 5:28
Clinical Update: Removable Partial Denture
  classification, parts and design, 1:22
  final impressions, 3:25
  reshaping teeth for denture construction, 2:24
  try-in, 6:22
Corn syrup and caries, 3:11

Dental floss, 1:5
Dentists, career orientations of dental wives, 4:23
Dentures, removable partial, 1:22; 2:24; 3:25; 6:22
Diagnosis
  differential, pseudoepithelial hyperplasia vs. carcinoma, 6:9
  endodontic, 5;25
  epidermoid carcinoma, x-ray exposure and, 6:3
Disinfection of hands, 6:11

Employees, dismissal of, 6:14
Enamel-bonded prosthesis, 5:30
Enamel lesions, remineralization of, 4:13
Endodontia
  diagnosis, 5:25
  restoration, single-unit post, core and inlay, D17
  Sargenti N2 method for root canal, 2:30; 5:17
England, Wales, state dental services, 1:13

Floss, dental, effect on plaque and gingivitis, 1:5
Fluoride(s)
  age and length of exposure to, effects of, 4:3
  in drinking water, effects on root surface fluoride concentration, 4:3
  high-caries risk patients, 2:11
  professionally applied, topical, 3:3
  school-based weekly rinse programs, 2:21
  self-applied, for home use, 2:6
  symposium: Fluorides for Everyone, 2:5,6,11,21; 3:3
  topical application technique, 3:3
Fracture(s), jaw, intermaxillary fixation for, 3:22

Genetics and dentistry, 1:19; 6:3

Hand disinfection, 6:11
Hepatitis B virus (letter), 1:29
Herpes infections, 1:16
Humanistic oral hygiene instruction, 3:15
Hyperplasia, pseudoepithelial, 6:9

Inherited oligodontia, 1:19
Intermaxillary fixation, 3:22

Jaws, fractures of the, 3:22

Laminate veneers
  maintenance of, 1:9
  personalized, for optimal esthetics, 3:20
Letters to the Editor
  hepatitis B virus, 1:29
  Sargenti N2 root canal method, 2:30
Louis-Bar syndrome, 6:3

Management, office stress, 6:17

N2 treatment, Sargenti method, 2:30; 5:17

Occlusal sealants, 5:3,11
Office managment, staff dismissal, 6:17
Oligodontia, inherited, 1:19
Oral fluid, effect on remineralization, 4:13
Oral hygiene instruction, humanistic, 3:15
Osteoradionecrosis, prevention of, 4:8

Partial denture, removable, 1:22; 2:24; 3:25; 6:22
Patient chest tray, dental, fabrication and use, 5:28
Pit and fissure sealants, 5:3,11
Product News, 1:8,12,18,21; 3:30; 4:30; 6:19,28
Prosthesis, enamel-bonded, 5:30
"Pseudocancer" (pseudoepithelial hyperplasia), 6:9
Pseudoepithelial hyperplasia, 6:9

Radiation therapy, osteoradionecrosis prevention, 4:8
Remineralization of enamel lesions, 4:13
Removable partial denture, 1:22; 2:24; 3:25; 6:22
Resin restoration, 4:27
Restorative dentistry, 1:9; 3:20; 4:27; 6:20
Root canal
  diagnosis of, 5:25
  post, core and inlay restoration, 6:20
  Sargenti N2 method, 2:30; 5:17
Root surface fluoride concentration, 4:3

Sealants, occlusal, 5:3,11
Sodium fluoride, *see* Fluoride(s)
Spectro-Jel degerming agent, 6:11
Staff dismissal, 6:17
State dental service, Great Britain, 1:13
Stress prevention, 6:17
